

Teaming Up with Beyonics for Engineering Training

Following a long-standing partnership, RP signed a Memorandum of Understanding with Beyonics International Pte Ltd, Asia's leading precision engineering, electronics and plastic parts manufacturing firm, in September 2016.

Beyonics representatives, Mr Scott D. Smith, Chief Executive Officer (CEO), and Mr Sean Ng, Director of Operations, graced the signing ceremony with RP representatives, Mr Seto Lok Yin, Deputy Principal (Industry Services) and Mr Tan Heap Jui, Deputy Director, School of Engineering.

RP and Beyonics have been working together on the Industry Immersion Programme (IIP) for our students. Through this programme, our students benefited from industry-related learning opportunities.

The collaboration strengthens our relations and allows for more student internship prospects for various diplomas. Our students can also look forward to enhanced educational opportunities through industrial visits, sponsorships of student scholarships and book prizes, and industry mentorship programmes.
