

Partner with Beyonics for contract manufacturing of precision medical devices and high value product solutions.

Beyonics provides a full spectrum of engineering, design, tooling, prototypes and manufacturing solutions across the medical sector.

As a leading medical device contract manufacturer, we specialize in vertically integrated solutions, including medical plastic injection molding, metal stamping, PCBA, and high-speed automated assembly of medical devices. Our highly skilled team ensures top-class quality and regulatory compliance in every device we produce.

Our customer centric approach drives operational excellence and delights our customers by delivering solutions and services beyond expectations.

FDA Certified Reg No: 3003080184

Unlock a wide range of medical device solutions and services through our expertise.

Medical & Diagnostics Devices

- Surgical devices
- Diagnostic devices
- Diabetes care
- Disposables
- Invasive
- Test & measurement kit

Pharma & Consumer Health

- Blood glucose infusion meters
- Continuous glucose monitoring devices (CGMs)
- Hearing aids
- Eye care products
- Wearable systems
- Digital health

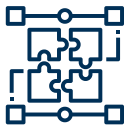

Speeding up time-to-market with our advanced technology and deep industry expertise.

Leveraging the integrated resources and decades of precision engineering expertise from early engagement to final manufacturing and accelerate time-to-market.

Accelerating product development with rapid prototyping and seamless project management, creating value across the entire product lifecycle.

Partnering with us ensures scalable, low-risk solutions through our strategic manufacturing footprint across Singapore, Malaysia, Thailand, and China.

Delivering GAMP-compliant, automated cleanroom assembly solutions that enhance efficiency, reduced costs and meet global medical device supply requirements.
