

Partner with Beyonics for strategic manufacturing of precision medical devices—transforming concepts into compliant, high-value products.

Beyonics delivers a full spectrum of engineering, design, tooling, prototyping, and manufacturing solutions for the medical sector.

As a leading strategic manufacturing partner in MedTech, we specialize in vertically integrated solutions—from medical plastic injection molding and metal stamping to PCBA and high-speed automated assembly. Our highly skilled team ensures superior quality and rigorous regulatory compliance for every product.

Driven by a customer-centric approach, we achieve operational excellence by consistently delivering solutions and services that exceed expectations.

FDA Certified Reg No: 3003080184

Unlock a wide range of medical device solutions and services through our expertise.

Medical & Diagnostics Devices

- Surgical devices
- Diagnostic devices
- Diabetes care
- Disposables
- Invasive
- Test & measurement kit

Pharma & Consumer Health

- Blood glucose infusion meters
- Continuous glucose monitoring devices (CGMs)
- Hearing aids
- Eye care products
- Wearable systems
- Digital health

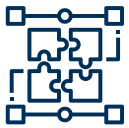

Speeding up time-to-market with our advanced technology and deep industry expertise.

Leverage our integrated resources and decades of precision engineering expertise from early engagement to final manufacturing to accelerate your time-to-market.

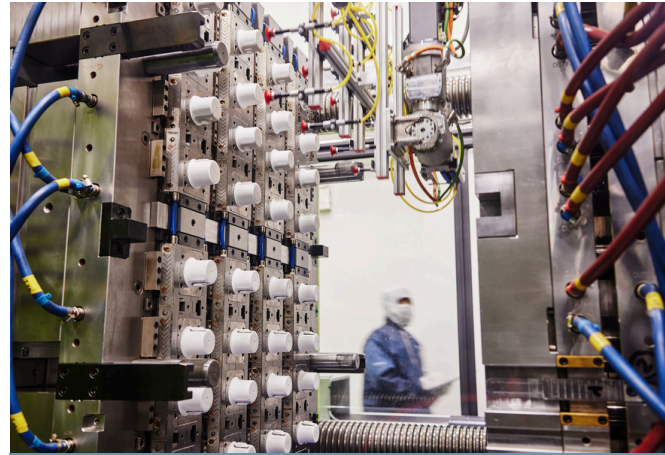

Accelerate product development with rapid prototyping and seamless project management, delivering value across the entire product lifecycle.

Partner with us for scalable, low-risk solutions, supported by our strategic manufacturing footprint across Singapore, Malaysia, Thailand, and China.

Delivering GAMP-compliant, automated cleanroom assembly solutions that enhance efficiency, reduce costs, and meet global medical device supply requirements.
